GEAPS/K-State Hands-On Training for the Operation and Maintenance of Conveying Equipment

Flour Milling for Wheat Commissioners and Staff

India Sorghum Feed Manufacturing and Poultry Nutrition course participants visited the Concordia Terminal in Concordia, Kansas, to learn how commodity crops are moved through the supply chain prior to export.

IGP Hosts India Sorghum Checkoff Course for Poultry Nutrition

IGP hosted the India Sorghum Feed Manufacturing and Poultry Nutrition course in November. Of the eleven participants, nine were feed manufacturers and poultry nutritionists from India along with two U.S. Grains Council staff members also from India.

The primary goal of this course was to introduce U.S. sorghum to these industry leaders and demonstrate how it can be used to improve poultry feed formulations.

This day-and-a-half course gave participants a deeper insight into U.S. sorghum characteristics as well as its potential to enhance poultry nutrition. They learned the nutritional profile of sorghum, including having no tannins and its status as a non-GMO grain, both of which are important factors in the Indian market. Through presentations and hands-on activities,

participants learned how sorghum can be processed, formulated into feed, and used to optimize poultry production and nutrition.

Course manager Carlos Campabadal explained how this course highlighted the benefits sorghum provides to the poultry industry by giving a better understanding of how to implement sorghum in poultry feed diets.

November Trainings and Activities

- Conducted the NGFA–FSMA course: 25 participants
 - Conducted the USGC–USCP Sorghum India Poultry Nutrition and Feed Manufacturing course: 11 participants
 - Conducted the Buhler–KSU Flowsheet Technology (English) short course: 8 participants
 - Attended the USW Fall Board Meeting, Phoenix, Arizona
 - Attend and presented at the Kansas Wheat Commission Board meeting, Manhattan, Kansas: Impact 16
 - Taught a virtual lecture for North Dakota State University for ASM 323: 30 students
 - Hosted Sioux Steel for a joint research project
 - Presented at the KGFA 7B/4 Recertification program on Pest Control Techniques for Grain Facilities: 50 participants
 - Traveled to Colombia to work on an aquaculture project
 - Served as instructor for the virtual offering of USSEC’s SEC Egypt Feed Manufacturing Intermediate Level Course: 75 participants
 - Presented at USSEC’s SEC Americas webinar on Implementation of a Biosecurity and Feed Safety Program at a Feed Mill: 175 participants
-
