INTERNATIONAL GRAINS PROGRAM

Upcoming in November

NGFA–KSU Food Safety Modernization Act Industry Training

Buhler–KSU Flowsheet Technology

Participants in the USW–IGP Basic Milling Principles for Taiwan course interact during a lab baking exercise using different types of flour to bake bread and cookies to learn the effects on the final products.

IGP Hosts Two U.S. Wheat Asian Milling Courses in October

IGP hosted two U.S. Wheat Associates courses in October. The Basic Milling Principles for Taiwan course had 10 participants and the Advanced Milling for South Korea course included five participants.

These courses provided students with a better understanding of the flour milling process along with advanced techniques and tools to optimize mill efficiency. Participants had the opportunity to engage in practical, hands-on learning exercises at the Hal Ross Flour Mill and the KSU milling and baking labs in Shellenberger Hall.

Yii Huang, U.S. Wheat Associates Country Director for Taiwan said the opportunity for their industry participants to get time working in the Hal Ross Mill along with the hands-on baking lab exercises using flour from different classes of wheat to bake various products helped them understand the importance

of using high-quality wheat in the milling process to achieve the best results.

Shin Hak (David) Oh, U.S. Wheat Associates Seoul Food/Bakery Technologist, has partnered with IGP to bring several groups from South Korea to attend milling courses. Many participants have commented that the experience improved their results when milling U.S. wheat classes.

On-site

October Trainings and Activities

- Conducted the USW–IGP Advanced Milling for South Korea short course: 5 participants
 - Conducted the USW–IGP Basic Milling for Taiwan short course: 10 participants
 - Conducted the USDA Turkey–IGP U.S. Grain Warehousing Regulatory Overview, A Foundation for the U.S. Grain Marketing System course: 12 participants
 - Presented to Chile’s Office of Agricultural Studies and Policies (ODEPA), impact 4
 - Attended the Ag Economics Meeting
 - Attended the Food Security Scholar Tour
 - Hosted the Alpha Mu Banquet
 - Participated in a podcast interview on grain storage for KSU’s Agriculture Today: <https://agtodayksu.libsyn.com/1781-storing-grain-safely-and-wellcoocidiosis-in-all-cattle>
 - Traveled to Monterrey, Mexico to provide technical assistance to Ragasa (biggest importer of U.S. soybeans into Mexico)
 - Hosted as part of the managing team for Kibble Con 2024 in Manhattan, Kansas
 - Participated on the USDA FGIS Grain Inspection Advisory Committee
 - Guest presented for AGECE 720 – Agribusiness Risk Management “Understanding CME Variable Storage Rates and their Impact”
 - Virtually attended the 2024 Corn Belt Ports & Upper Mississippi River Regional Multi-Modal Port & Logistics Center Annual Meeting in Moline, Illinois
 - Participated in the U.S. Grain Council Export Exchange in Dallas – Ft. Worth, Texas, and presented a paper on “Developing a Value Based Procurement Model”
 - Virtually attended the UNL 2024 Symposium: Opportunities for Leadership in the Global Trading System
-
